

## New classrooms in days

INSTALLED  
IN  
**7-10**  
DAYS

- ✓ Exceeds DoE recommendations for classroom space and BB103 guidelines for Basic Teaching
- ✓ Full project management
- ✓ Installed between terms – or even at half term

“A recent OFSTED report praised the effect the log classrooms have on pupils’ concentration and attitude to learning.”

Alastair Graham, Headmaster,  
Hall Grove School, Surrey

# Need more teaching space?

## The almost instant solution

We have an almost instant solution: our light, airy Inovar classrooms. We can usually install them in just 7-10 days. So you can have new accommodation for the start of term, or even after half term.

We manufacture our classrooms as substantial modules in our own factory, all roofed, plumbed, wired and ready for your equipment. Then we simply join the modules on your site, with minimal disruption. Our classrooms don't need extensive, time-consuming and expensive groundworks, just a simple hardstanding.

## Full project management

We manage the whole process for you: architecture, engineering, Planning, Building Control and installation.

## Flexible learning spaces

Our classrooms offer complete flexibility, and are suitable for virtually any teaching purpose, including laboratories, for pupils of any age.

## Environmentally sound

We source our logs exclusively from sustainable forestry, and select all materials with regard to their environmental credentials.

## Low running costs

A high level of insulation keeps energy costs low. And the immense strength of our rigid log construction technology means your classroom will have an indefinite lifespan with only minimal maintenance – and no redecorating.

## Up to 25 years' warranty

All our Inovar classrooms come with a ten-year warranty, which you can extend up to 25 years by subscribing to our optional inspection plan.

## Challenging site?

If access is difficult, we can still deliver our classrooms in non-modular form. Installation takes a little longer then, of course.

## Case study

**Oversubscribed Kington St Michael CE Primary School, near Chippenham, has grown by more than 50% over the last few years, and has an OFSTED Outstanding rating. Headteacher Tracy Cornelius needed extra space urgently.**

She chose one of our Inovar buildings, with a fully fitted 54m<sup>2</sup> classroom, lobby and two toilets. We installed her new classroom in just seven days, with minimal disruption to the site, staff and pupils.

*“The children love it. It has a fantastic atmosphere, and is a really nice learning environment. We wanted a building in keeping with the school and our rural surroundings. We also wanted it to be smart, not like an old-fashioned mobile classroom, and to be a permanent fixture that would last.”*

Tracy Cornelius, Headteacher,  
Kington St Michael CE Primary  
School, Wiltshire

# Traditional design, too

Our Inovar classrooms have contemporary styling. If you'd prefer something more traditionally Scandinavian, we also offer Norwegian Log models from one of Norway's leading manufacturers.

## Case study

**Hall Grove School in Surrey needed extra space to cope with a large influx of pupils. Temporary buildings seemed the obvious solution, but Headmaster Alastair Graham was concerned about their visual impact in the school's rural setting.**

The quality of construction of our Norwegian Log classrooms impressed Mr Graham, and he went on to install two Norwegian Log buildings, each with two classrooms. They have proven so successful, with low heating and maintenance bills, that the school now has five Norwegian Log buildings with a total of nine classrooms.

*“My staff and I think the log buildings have a calming effect on students’ behaviour. The boys and girls will tell you that they love being taught in them”*

Alastair Graham, Headmaster,  
Hall Grove School, Surrey
